Mark Sardella, Director
Local Energy
P.O. Box 1300
Santa Fe, NM 87574

Dear Mr. Sardella,

I am writing this letter in support of your efforts to study the feasibility and benefits of biomass-fired district heating in Santa Fe.

Pursuant to the city approved Railyard Master Plan and our Lease and Management Agreement with the city, we are implementing the development of over 300,000 sq. feet of new construction on the city owned fifty acre property. Our enterprise would benefit greatly from such alternative technologies through more cost effective infrastructure development for our current and future tenants.

Sincerely,

Steven Robinson
President
